

AutoCapture and MailArchiver

Received, Imported, Recorded

Do you receive your invoices as an attachment in PDF format by E-mail?

These electronic documents can also be easily captured in just a few steps. The solution is AutoCapture interface integrated with the FileDirector MailArchiver.

Easy implementation

Do you already use our FileDirector MailArchiver?

In this case, simply add the appropriate mailbox for incoming invoices and select the AutoCapture option in the scheduler.

You can use the comprehensive FileDirector AutoCapture routines for your incoming invoices in PDF format.

This not only saves time and money, it also supports you and your company in the field of traceability; directly from the beginning.

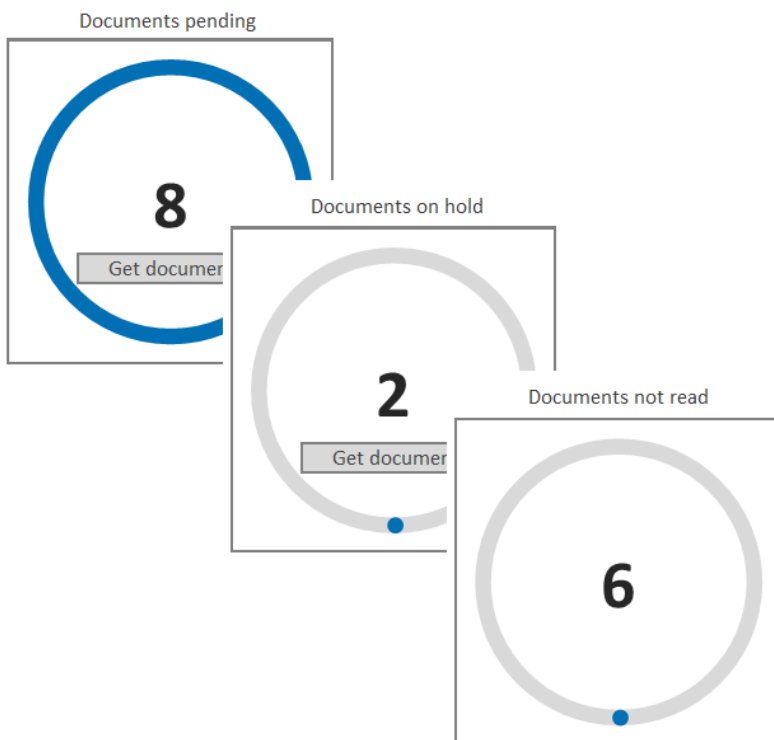

Be informed

FileDirector AutoCapture provides you with a clear overview of the status of the automatic processing of your incoming invoices.

This information can be easily and automatically sent by e-mail or displayed at any time in AutoCapture Client statistics.
