Tradition meets Modernity

Have you ever thought about a contemporary way of dealing with your files?

The only reason for postponing it, is that a modern, software-based ECM does not feel familiar.

Our recommendation is the FileDirector RecordView. It combines the familiar look & feel of a traditional filing-system with the speed & convenience of a contemporary ECM system.

FileDirector RecordView offers you a complete new and comfortable way of retrieval - excellent for HR departments or your customer service team.

Stick to your Procedures

FileDirector RecordView reflects your archive, grown over the years, and brings it on the screen. An easy-to-use Explorer-like structure allows you a fast and smart access to the required information.

Our development has even managed to bring the traditional page turning into the 21st century. Once you've selected e.g. the employees number, you can scroll very comfortably through the selected file using the coverflow.

Information at a glance

The customisable cover sheet offers you all important information on the screen.

Of course, FileDirector RecordView comes with a full-text search ability.
